Cloudy Days

Agapanthus orientalis

• A great mid sized companion for Queen Mum

• Less viable seed head

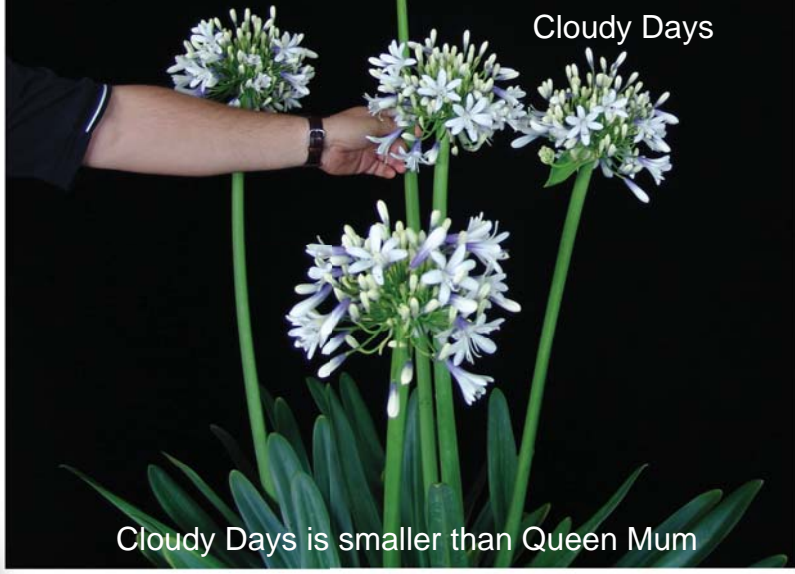

Cloudy Days is a mid sized Agapanthus orientalis that when placed with Queen Mum gives good height contrast in the landscape. It has excellent disease, frost and humidity tolerance. Cloudy Days prefers sunny positions, but will tolerate shade. Great for garden beds, borders, waterwise gardens, patio pots and planter boxes. Dispose of spent flower stems properly if near bushland.

Queen Mum

Cloudy Days

Cloudy Days is smaller than Queen Mum

Cloudy Days has glossy green, strappy foliage with beautiful clusters of flowers. These dual coloured white and blue flowers appear in the summer months.
