## RANGE OF PLANTS

### Extraordinary PBR plants without the need for a license

Emporium is an open range of plants from Ozbreed that require no license to sell. They do not fit in any of Ozbreed's landscape ranges and are better suited to the retail environment. Pure Blonde, for example, sold well in its first year through retail stockists who supplied it.

### License free PBR plants

Now you can grow some of Ozbreed's Emporium plants in your wholesale nursery without need for a license. Royalties for each plant are attached to the labels, with labels for each plant available at Norwood Industries. Once you buy the plugs, Ozbreed will register your nursery to allow purchase of these labels (no action required on your part). **Nurseries cannot propagate these plants unless a self propagation license is issued from Ozbreed, and an approved label must be on each plant sold.** No license is required when buying plugs from authorized propagators.

Pre orders now being taken for March-April 2011. **Essential to pre order now or you will miss out.**

**Variegated Tibouchina**

# OLIVIA™

*Tibouchina urvilleana* 'TIB01' 

Olivia is an impressive variegated form of Tibouchina. Red velvety buds open to rich royal purple blooms. These flowers appear from autumn to winter and the soft variegated foliage will develop splashes of pink, yellow and green throughout the year. Olivia grows into a small tree/large shrub at approximately 1.5 - 2 m tall.

Splashes of colour throughout the year

DESCRIPTION	Variegated Tibouchina, masses of purple flowers
HEIGHT & WIDTH	1.5 - 2 m x 2 m
POSITION	Full sun to part shade
CARE	Keep moist in dry weather, protect from heavy frost
USES	Garden specimen plantings, large tubs
SOIL TYPE	Well drained moist soils

## Beautiful winter foliage

More compact form

## PHEONIX™

*Ptilotus exaltatus* 'Platinum Wallaby' (P)<sub>PR</sub>

Phoenix is a rounded perennial growing to approximately 50cm in height with deep green leaves and red-purple margins. Phoenix carries spikes of feathery pink flowers above the plant all year. It is tolerant of extreme heat and cold. Pheonix looks great in a 140mm pot.

DESCRIPTION	Rounded perennial with feathery pink flowers
HEIGHT & WIDTH	Approx. 50 cm x 50 cm
POSITION	Sunny position
CARE	Prune spent flower stems
USES	Highly decorative container plant or cut flower
SOIL TYPE	Well drained soils

Pre orders now being taken for March-April 2011.  
**Essential to pre order now or you will miss out.**

## PURE BLONDE™

Liriope muscari 'LIRBLONDE' 

Pure Blonde is one of a kind! If you cut Pure Blonde back to the ground in July, it will re-shoot blonde in August to September depending on where you live. It stays blonde for about 3 months in spring, then it slowly turns green. By mid summer it is mainly green, helping it do better in the hot weather. In autumn there are often new greenish blonde shoots. **Don't judge a book by its cover, Pure Blonde is tough.**

DESCRIPTION	Clumping plant, white foliage in spring
HEIGHT & WIDTH	30 cm x 40 cm
POSITION	Full sun to heavy shade
CARE	Cut back each July
USES	Feature plant, groundcover
SOIL TYPE	Sandy to clay soil types

Pure Blonde looks great with Black Mondo

## CORAL™

*Cordyline australis* 'LELC01' 

Coral provides a pastel colour contrast for gardens. Its pastel pinks and darker brownish greens give gardens a more natural colour contrast. It is tougher than most Corydlines and is less likely to burn in the sun and discolour in the cold. It is great as a feature plant or in a mass planting.

DESCRIPTION	Pastel and dark toned foliage
HEIGHT & WIDTH	1-2 m x 80-100 cm
POSITION	Full sun to heavy shade
CARE	Cut back if desired
USES	Colour contrast, mass planting, specimen planting
SOIL TYPE	Sandy to moderately heavier soils

# TIA®

Thelionema grande 'TG100' 

Tia has blue-green strappy leaves, that are denser than the common form. In spring and summer it provides a fantastic flowering display of blue-purple flowers. It contrasts nicely with green, or red toned plants. It is a good plant for along fences and paths. Tia has good drought tolerance, and is generally an adaptable plant.

DESCRIPTION	Mass flowering with blue/green strappy leaves
HEIGHT & WIDTH	60-70cm x 60-70cm
POSITION	Tolerates full sun to part shade
CARE	Remove older leaves annually
USES	Specimen planting, small mass plantings, along paths
SOIL TYPE	Tolerates a wide range of soils

## LITTLE SAPPHIRE®

*Stylidium graminifolium* 'ST116' 

Little Sapphire has striking blue foliage that gives the appearance of a miniature grass tree. It boasts exquisite deep pink flowers that are elevated just above the foliage. It is perfect for rockeries, borders and mass plantings. Little Sapphire is frost and drought tolerant.

DESCRIPTION	Blue foliage tussock, looks like a grass tree
HEIGHT & WIDTH	20cm x 20cm
POSITION	Full sun to part shade
CARE	Use a native slow release fertiliser, trim old flower spikes
USES	Rockeries, borders and mass plantings
SOIL TYPE	Wide range of soils
